

Company Policy Document

ABC Technologies — Customer Support Policy Reference · Version 3.2

1. Refund Policy

ABC Technologies offers a **14-day money-back guarantee** on all new subscription purchases (Basic, Professional, and Enterprise plans). Customers may request a full refund within 14 calendar days of their initial purchase date by contacting billing@abctechnologies.com or submitting a request through the Billing support channel.

- Refunds for **annual plans** requested after the 14-day window are prorated: the customer is refunded for unused months minus a **7% administrative fee**.
- Refunds for **monthly plans** are not available after the 14-day window; the customer may cancel to stop future billing, but the current billing cycle is non-refundable.
- Refund requests are processed within **5–7 business days** and returned to the original payment method.
- Accounts suspended for a Terms of Service violation are **not eligible** for a refund, regardless of the 14-day window.
- All refund requests of any amount require **human supervisor approval** before processing — refunds are never auto-approved by the support system.

2. Subscription Cancellation Policy

Customers may cancel their subscription at any time from Account Settings > Billing > Cancel Subscription, or by requesting cancellation through support.

- Cancellation takes effect at the **end of the current billing cycle**; customers retain full access until that date.
- No partial-month refund is issued for monthly plans upon cancellation.
- Annual plan cancellations follow the prorated refund rule described in Section 1.
- Cancelling does not delete the customer's data — data is retained for **90 days** in case the customer reactivates.
- All cancellation requests require **human supervisor approval** before being finalized, to allow a retention specialist the chance to offer alternatives.

3. Account Closure Policy

Account closure is permanent and distinct from subscription cancellation: it removes the customer's account, all associated data, and billing history.

- Account closure requests must be submitted in writing (email or support ticket) by the account owner.
- Upon approval, all customer data is permanently deleted within **30 days**, in line with our data retention policy.
- Any active subscription is cancelled simultaneously; standard refund rules from Section 1 apply to the remaining balance.
- Because this action is **irreversible**, every account closure request requires explicit **human supervisor approval** — the support system must never close an account automatically.

4. Escalation Policy

Certain requests must be escalated to a human supervisor rather than resolved automatically by the support system. Escalation applies to:

- Refund requests of any amount (Section 1)
- Subscription cancellation requests (Section 2)
- Account closure requests (Section 3)
- Compensation or goodwill credit requests
- Any request the customer explicitly asks to escalate to management
- Repeated complaints from the same customer about an unresolved issue (3 or more contacts on the same ticket)

When a request is escalated, the AI system must present the customer's query, the proposed response, and the reason for escalation to a human supervisor. The supervisor may approve, edit, or reject the proposed response before it is sent to the customer.

5. Support Service Level Agreement (SLA)

Plan	First Response Time	Resolution Target	Support Channels
Basic	24 business hours	3 business days	Email
Professional	8 business hours	1 business day	Email, Live Chat
Enterprise	1 hour (24/7)	4 hours (critical), 1 day (standard)	Email, Chat, Phone, Dedicated Manager

Critical issues (full application outage, data loss, security incidents) are escalated immediately regardless of plan tier and bypass the standard queue.

This document is maintained by the Customer Success team and reviewed quarterly. Last updated: this version supersedes all prior policy documents.
