

Frequently Asked Questions (FAQ)

ABC Technologies — Customer Self-Service Reference

1. Password Reset

Q: How do I reset my password?

Go to the login page and click **'Forgot Password'**. Enter the email address associated with your account. You will receive a password reset link valid for **30 minutes**. If you don't see the email within 5 minutes, check your spam folder.

Q: I didn't receive the password reset email. What should I do?

First check your spam/junk folder for an email from no-reply@abctechnologies.com. If it's not there after 10 minutes, request a new reset link — the previous one will expire automatically. If the problem continues, contact Account Support to verify the email on file.

Q: My account is locked. How do I unlock it?

Accounts lock automatically after 5 failed login attempts (error ERR-LOGIN-403). You can wait 15 minutes for the lock to clear automatically, or reset your password immediately to unlock the account right away.

2. Invoice Download

Q: Where can I download my invoices?

Go to Account Settings > Billing > Invoice History. All invoices are available as PDF downloads going back to the start of your subscription.

Q: Can invoices be sent automatically to a specific email?

Yes. Under Billing > Invoice Settings, you can add up to 3 additional email addresses to automatically receive a copy of each invoice as it's generated.

Q: Why does my invoice show a different amount than expected?

This is usually due to a mid-cycle plan upgrade (prorated charge) or a downgrade/cancellation credit applied to that billing period. Check the line-item breakdown on the invoice PDF, or contact Billing Support if the discrepancy isn't explained there.

3. Profile Update

Q: How do I update my profile information?

Go to Account Settings > Profile. You can update your name, email, phone number, company name, and time zone. Changing your email address requires verifying the new address via a confirmation link before the change takes effect.

Q: How do I change my company's billing address?

Go to Account Settings > Billing > Billing Address. Changes apply starting with your next invoice; the current period's invoice is not retroactively changed.

Q: Can I change my account's primary owner?

Yes, but this requires Account Support assistance for verification purposes. Submit a request with both the current and new owner's confirmation to begin the transfer.

4. Contacting Support

Q: What's the best way to contact support?

Plan	Available Channels	How to Reach Us
Basic	Email	support@abctechnologies.com
Professional	Email, Live Chat	In-app chat icon, or support@abctechnologies.com
Enterprise	Email, Chat, Phone, Dedicated Manager	Direct line provided to your account manager

Q: What information should I include when contacting support?

- Your account email and company name
- A clear description of the issue, including any error codes shown
- Steps you've already tried
- Screenshots or a diagnostic log export, if applicable (Settings > Diagnostics > Export Logs)

Q: Can I escalate my issue to a manager?

Yes. You can request escalation at any time, and it will automatically happen if the same issue remains unresolved after 3 separate contacts. Escalated issues are reviewed by a human supervisor rather than resolved automatically.
